

Get cleaner energy for your home...

...and pay for it at a pace you can afford!

Clean Energy Financing helps you invest in upgrades that reduce energy use in your home.

Thanks to financing from your municipality, you can pay for the upgrades over a 10-year period. We'll make sure you save as much or even more in energy expenses than the cost of the retrofits. Your investment pays for itself!

Check our website at CleanEnergyFinancing.ca to learn more about the program, including which local contractors are pre-approved to complete your home upgrades.
